

AI-Powered Situational Awareness System (SAS)

POC Architecture Diagram

This diagram represents the Proof of Concept (POC) level architecture for an AI-Powered Situational Awareness System. The focus is on validating real-time perception, edge AI processing, and alert generation using a minimal yet scalable setup.

POC Design Notes

- Cloud connectivity is optional during POC.
- Sensors can be real or simulated using recorded datasets.
- Architecture is designed for easy transition to full-scale production.
